

Subject: Recommendation letter for *Ms Melissa Yuri Campos Imai*

To whomever it may concern

As a Materials engineer at AIBN and supervisor at Australian Institute for Bioengineering and Nanotechnology (AIBN), The University of Queensland (UQ), Australia, it gives me an immense pleasure to write this referral letter in strong support of Ms Melissa Yuri Campos Imai. I have known her, since she has been associated with me as 'Research Intern/Trainee' from March 2015. She has been working on an intern research project in the areas of '***Production of lignocellulosic fibres with different composition from *Triodia pungens****' from ***March 2015 to June 2015***.

During many scientific discussions, she has impressed me as a serious student of chemical engineering and fast learner for techniques. She has been very integrated in our team and did a great work which still stay as foundation for upcoming research in our team. Ms. Melissa has been very well trained with almost all the polymer characterization tools that are available AIBN, UQ. His both scientific and personal communication skills are highly appreciated.

She is, in my assessment, a very promising young and energetic candidate for a career in research and development and highly deserves the support for pursuing higher studies. Please do let me know, if you require any further details regarding her work. I am happy to assist you.

Yours sincerely

Dr. Pratheep Kumar Annamalai
